1.68 The design changed of E-Stop
Purpose

Implementation of the removal of the whole manipulator power for Stop Category 1 situation. Rotate the Emergency Switch to the pop-up state, and robot enters the Safe Start up Mode. Press the Stop Button on the Robot Stick for about three seconds, the robot will perform the calibration action of the start-up process and return to the original operating mode.

Equipment

TM5 / TM12 / TM14

Function operation
When the user activates Emergency Stop, TM Robot will decrease its speed to zero and then cut the power of the robot.

Rotate the Emergency Switch to the pop-up state. At this time, the robot arm will be re-powered. The Indication Light Ring will light up again with blue light, indicating it enters the Safe Start up Mode.

Press the Stop Button on the Robot Stick for about three seconds, the robot will perform the calibration action of the start-up process and return to the original operating mode.
Function operation (2/3)
